

Climate Chamber Mission

Overview

Glasgow Chamber of Commerce is hosting the Climate Chamber Mission, a unique hybrid two-day international trade and knowledge exchange mission which will be held during COP26.

This key business leadership initiative is designed to support business in the delivery of circular economy solutions, sustainability and climate targets. Invite only, the mission is for successful organisations in targeted territories who are seeking to build international partnerships.

The Climate Chamber Mission is designed to support businesses to learn, trade and connect. Participants will also have the opportunity to identify new revenues, whilst collaborating together on new markets, product ideas, cost-savings and prepare for likely changes in governmental regulations.

Businesses will have the opportunity to connect with up to 100 companies from 10 countries during COP26 this November. All delegates will receive business to business meetings with fellow attendees and will be invited to join prominent keynote speakers, bespoke expert forums, networking with peers and, for those in Glasgow, site visits and an evening reception on the 2 November.

An ongoing community for participating companies will be created following the mission, building on the legacy of COP26. This will facilitate future collaboration, innovation and business opportunities.

We hope that as many companies as possible will be able to travel to Glasgow this November. For those present in the city, there will be the opportunity to attend in person at City of Glasgow College's multi million pound award winning building. The Climate Chamber Mission will be broadcast from the college, providing easy access for delegates joining both online and in person.

We are delighted to be working with a number of partners, including the British Chambers of Commerce Global Network of overseas Chambers, as well a number of Circular Economy organisations.

Business Benefits:

- Participate in COP26 and demonstrate a real commitment in supporting the UN Sustainability Development Goals.
- Connect with up to 100 international businesses from 10 countries, all seeking to build international partnerships and achieve a more sustainable and decarbonised economy.
- Through collaboration, increase export and business growth opportunities.
- Network directly with national and international peers in knowledge exchange, sharing best practice and facilitated solutions focussed discussions.
- Gain ongoing support around circular strategies and business sustainability, including your climate targets, via your Chamber and Circular Expertise network.
- Remain connected with delegates post the event by joining the online Mission community.

Aim:

To support businesses in tackling climate change in alignment with COP26 ambitions.

1. To connect up to 100 businesses worldwide, sharing best practice to accelerate the transition towards a more sustainable and decarbonised economy.
2. To increase international collaborations, export and business growth opportunities.
3. To create an international business network via an online community, ensuring long term learning, innovation and implementation of both climate and business goals.

Vision:

For all participating businesses to increase international trade, adhering to net zero emissions by 2050, in alignment with COP26 ambitions.
